

## **Head of Mechanical Design- Delstar Engineering Limited**

Delstar Engineering specialises in the design, manufacture and installation of stage engineering and stage rigging equipment for the entertainment industry which ranges from the theatrical industry to concert halls and television.

We are seeking a highly motivated mechanical design engineer to head up and lead a team of mechanical designers. The individual must be interested in developing and mentoring the design team and demonstrate leadership in driving and assisting in a variety of special projects. The ideal candidate must have proven skills in mechanical and hydraulic equipment design, as the role will require you to provide the technical leadership for all design, stress and research and development activities within the theatre and special effects industry.

In order to be considered for the role, you must ideally have a degree in mechanical engineering along with competent knowledge of solid works or Catia. The company offers a competitive remuneration package commensurate with experience. If you require further information or would like to apply for this position please send your CV and covering letter to [mala.malde@delstar.co.uk](mailto:mala.malde@delstar.co.uk)
